

Alberta Crop Outlook Is Highly Encouraging Despite Bad Influences

From Sixty-five to Eighty Per Cent. of Wheat Now! In Stook Throughout West—Extent of Damage From Rust, Hail and Frost Not to Be Definitely Established Until Threshing Operations Well Under Way—Shortage of Help in Some Sections

Winnipeg, Man., Sept. 12.—Considerable rain during the last two or three days impeded harvesting somewhat in Alberta, reports the agricultural department of the Canadian Pacific Railway today. Cutting is general over the West and well advanced in many districts. In some instances cutting has been done even though grain has been on the green side, the farmers inclining to the belief that there is more risk in leaving the crop standing and having it freeze than in an shrinkage that might take place when cut before it is ripe. By the end of this week threshing should be fairly general and turn will reveal the true conditions as to damage from rust, hail and frost. It is generally conceded that in spite of these adverse influences, the crop will be a very satisfactory one, particularly in Alberta. Cutting of corn and sunflowers and filling silos has commenced. The run on cattle on local markets has fallen off during the week due to harvest activities. In Manitoba, 65 per cent. of wheat crop has already been cut and 45 to 55 of coarse grains. Little threshing has been done but this should be general before the end of this week. In certain localities some fields of quite green crops are to be seen, but a few days of good weather or see it ready for the binder. Early sown wheat is generally full. Later sown has in many instances suffered from rust damage and the durum wheats some lodging account of heavy rains. Barley on the whole is a good crop. Hay has been harvested in good condition, but rain did some damage to the later cuts. Pastures and livestock are in excellent condition. Seventy to seventy-five per cent of the wheat is in stook in Saskatchewan and fifty to sixty per cent of other grains. There is a shortage of harvest help in some localities. So far few threshing outfits are so far reported. Threshing should be general everywhere in Alberta by tomorrow. Slight frost on the night of the seventh over southwest Alberta was enough to most outlives to affect garden foliage and in some districts sufficiently heavy to endanger late wheat. Thirty-five to forty per cent cutting has been done in Southern Alberta, thirty to thirty-five per cent in Central districts and forty to fifty per cent in the northern portions of the province. Very few threshing outfits yet received, but such as are reported indicate encouraging yields and grades. Land is in excellent condition for sowing of fall rye, but comparatively little seeding has yet started. Sugar beet crop is an excellent one. Cold wet weather in many districts of British Columbia has held up harvesting and fruit shipping activities. Conditions are now favorable, plenty of moisture will carry the crops through the balance of the season. Transparent and Dutchess apples have mostly moved and crab apples, pears and Westlins are commencing. Apples are sizing up well as there is ample moisture in the soil. Ensalage corn is a good crop and fodder of all kinds is plentiful. Farmers are now cutting their third crop of alfalfa which is yielding well. Tobacco in the Okanagan is satisfactory crop, but harvesting has been slow on account of recent heavy rains.

Send Resolution to Association Municipal Districts Re. Grants

The council meeting of M.D. of Bigstone 459, was held Sept. 7th, at Lone Ridge, with J. L. G. Ratray, Reeve, and Councillors C. J. Hanson, Ratray, John Hanson, Krause, Arnold and Helmers in attendance. Minutes of former meeting and special meeting read and adopted. Letter from Minister of Public Works read, stating that he was not in favor of extending the grant into next year in the event of all the grant being unexpended this year. Motion by Coun. Arnold that Secretary-Treasurer be instructed to take this matter up further with the Minister with a view to having the grant carried over until next year in the event of all the grant being unexpended this year. Carried. Letter from the Association of Municipal Districts read in connection with annual convention read. Motion by Coun. Arnold that membership fee be paid and two delegates be sent to the convention. Motion by Coun. C. J. Hanson that delegates be allowed \$25 each to cover all expenses. Carried. Motion by Coun. Arnold that Councillors and Ratray and Helmers be appointed delegates to the convention of Municipal Districts. Carried. The Secretary-Treasurer reported having sold the following lands at the tax sale held on the 21st of August: N.E. 2-45-27-4th, price \$215; S.W. 2-45-27-4th, price \$245; S. 1/2 N.W. 30-47-25-4th, price \$190. By-law No. 29, a By-law for the prohibition of animals running at large was read and finally passed on motion of Coun. John Hanson. Mr. Sjogren reported that a ratepayer was in very needy circumstances. Motion by Coun. John Hanson that Mr. C. J. Hanson be authorized to supply any necessities needed by Rudolph Anderson. Carried. Motion by Coun. Ratray that Councillor John Hanson be instructed to look after Mr. Anderson's needs until he is able to be around again. Carried. Motion by Coun. Arnold that Evans be allowed a sum of \$15 per month for three months. Carried. Motion by Coun. John Hanson that Coun. H. Arnold be Deputy Reeve for the remainder of the municipal year. Carried. Motion by Coun. Ratray that M. H. Unland be appointed Poundkeeper in place of W. R. Frye, resigned. Pound to be on the S.E. 18-45-27-4th. Carried. Motion by Coun. Helmers that Weed Inspector Young be allowed two more days to complete necessary work. Carried. Motion by Coun. Arnold that the following resolution be sent to the Association of Municipal Districts: "Resolved that each Municipal District be notified from the Dept. of Public Works as to the amount of the Public Works Grant to be expended within their Municipality and that this notification be sent early in the year to enable them to allocate their expenditures on Public Works. Carried. The meeting adjourned.

DELEGATES TO BE CHOSEN FOR NATIONAL CONVENTION AT WINNIPEG NEXT MONTH

A Convention of the Liberal-Conservative Party for the Federal riding of Wetsaskiwin, will be held in the hall above C. W. Niles' Store, Railway street West, Wetsaskiwin, on Wednesday, September 21st, 1927, at 3 p.m. to select delegates for the National Convention to be held in Winnipeg, commencing October 10th. The constituency is entitled to four delegates in addition to the candidate at the last election. It is hoped that there will be a large attendance, and the Executive particularly desires the attendance of all ladies who are interested in the welfare of the Party. Four alternate delegates will also be chosen. Senator Griehahn, of Edmonton, and other speakers, will address the meeting.

The Indians of the Hobbema reservation received their second payment this week on account of the sale of the Mac-Mac Beach property.

"Overcoats" for Wheat, Says Motherwell

Toronto, Sept. 9.—Wheat with double chaff, to protect it against early frosts in Western Canada, is urged by Hon. W. R. Motherwell, minister of agriculture, who spoke on Saskatchewan day at the Canadian National Exhibition yesterday. The breeding of wheat with a double chaff, he thinks, is quite within the range of possibility.

"For a cold night you put on an overcoat," he asserts, "I see no reason why we should not put an overcoat on our wheat to protect it against early frost."

First, the ripening period would have to be reduced to a minimum and then, with a coat of double chaff, the Saskatchewan wheat could be immune to devastating cold.

POLICE MAGISTRATE HAS BUSY WEEK

John Kellner and Joe Rivet, of no fixed abode, appeared before Police Magistrate R. M. Angus on Monday on a charge of intoxication, and were fined \$20 and costs each. An additional penalty of \$5 was assessed to Kellner for having in his possession small arms.

Joe Mink, a Thursty Indian, who was gathered out of a ditch near the corner of Thursty Ave. and the Calgary Trail by Chief Kingzett, took 12 hours to come out of his trance and was fined \$20 and costs or 30 days.

Matilda Nomitz formerly of Bashaw, was given 14 days at the Fort on a charge of vagrancy.

Obituary

OLE EDWARD OLSON

One of the early settlers of the district passed away at his home early Saturday morning in the person of Ole Edward Olson, at the age of fifty-one years, two months and twenty-eight days. Deceased had been in ill health for the past year, suffering from heart trouble, but his death came as a shock to everyone.

He was born in Millville, Minn., where he lived until 1881, when he moved to Deuel County, S. Dakota. In 1900, after his marriage, he came to Wetsaskiwin, settling four miles south of town, where he has lived until the time of his death.

He leaves to mourn his loss, his wife, three daughters, namely, Laura, Nina and Florence, and two stepsons, Miller Mikelson, also two stepdaughters, Mrs. Rose Olson, Red Wing, Minn., and Mrs. Ingeborg Holstad, of Fertile, Minn., besides a large circle of friends and acquaintances.

The funeral, which was largely attended, took place Sunday afternoon, at the First United Church. The service being conducted by Rev. A. L. Elliott. The floral tributes were beautiful and numerous, and among those who contributed were, the Family, Mr. and Mrs. H. T. Rix, Mr. and Mrs. Wm. Schantz, Mr. and Mrs. R. Kasur, Lee Wing's family, the Hospital Staff, Henry David, the Guller family, Mr. and Mrs. Moon, Mr. and Mrs. Portis, Mr. and Mrs. Bye, Mr. and Mrs. Belsham, Mr. and Mrs. Jorgeson, Mr. and Mrs. Treca, Mr. and Mrs. Folland, Mr. and Mrs. Ness, Mrs. Lykken, Mr. Ronnie and many others.

The pall-bearers were Messrs. J. Asp, A. Erickson, J. Malmes, J. Wick, E. Lundell, O. H. Ronnie. The interment took place in the Wetsaskiwin cemetery.

Infantile Paralysis or Acute Poliomyelitis

Information on Disease Contained in Bulletin Issued from Provincial Health Department by Deputy Minister Dr. Malcolm M. Bow at Edmonton for Instruction of Parents

The use of the term "infantile paralysis" is somewhat misleading, because although ninety-five per cent. of these cases occur in children under ten years, persons up to forty or fifty years of age may develop the disease. In rural communities a larger percentage of adults are affected during an epidemic; but there is a more important objection to the use of the word "paralysis" for fifty per cent. (some authorities say eighty per cent.) of cases of acute Poliomyelitis do not develop paralysis. That means that during the early part of an epidemic, before parents and doctors are on their guard, there are from one to four unrecognized potentially dangerous cases of Poliomyelitis present in the community for every case that is recognized.

First Attack Gives Immunity

It is sometimes said that as a rule only one child in a family develops the disease. This statement may be true so far as the paralytic cases are concerned, but careful inquiry will usually elicit the information that other members of the family about the same time suffered from some systemic disturbance. In other words, they have had an attack of the abortive type of Acute Poliomyelitis. Persons who have had the disease of either or any type are in almost every instance immune to any further attack of the disease. Cases are known to have occurred.

The disease affects all races and all parts of the world, but is more prevalent in colder climates. Although it is a disease most common amongst children, almost no age is exempt. The robust child falls a victim as readily as the delicate child. The highest incidence of this disease occurs between the month of May and the month of November. In epidemics affecting rural communities, the disease appears to show a greater degree of infectivity. This is probably due to the fact that persons living in the country are less likely to be immune through contact or through unrecognized cases than in the city dweller.

Caused by Germs

Poliomyelitis is believed to be caused by a virus which passes through a filter capable of retaining such germs as those causing typhoid fever, diphtheria, cerebro-spinal fever and the like. It can be recovered from the secretions from the nose and throat after having been exposed on handkerchiefs and other similar things which have been handled or otherwise contaminated by a patient. It has also been found in the dust in rooms occupied by Poliomyelitis patients. The virus may also be present in the intestinal secretions.

We believe that it is communicated from person to person in the secretions from the air passages, especially the nose and throat, either directly by sneezing, coughing, or speaking, or indirectly through contaminated objects such as handkerchiefs, eating utensils, and probably by flies and other insects. The recently recovered victim of either a recognized or unrecognized case and the healthy carrier are undoubtedly responsible for much of the transmission of the disease.

Schools Close By Order Of Health Board

Every Precaution Being Taken to Prevent Spread of Infantile Paralysis—Two Cases Reported

A special meeting of the Board of Health was held in the council chamber on Monday evening, with R. M. Angus, chairman; Dr. McColgan, Mayor Montgomery, Dr. Gotthard, Chief of Police Kingzett and C. J. Hanson in attendance.

The meeting was called to consider the outbreak of infantile paralysis—two cases having been reported—and after deliberations the following resolution was unanimously passed:

"That all schools in the city be closed from this date, including public and high schools, separate school, Sunday schools and all other public gatherings of children of the age of sixteen and under. That the local theatre do not admit children of the age of 16 or under, and that no public gatherings of any kind be permitted to have children of that age in attendance. That all public dances be prohibited and that every precaution be taken to avoid the spread of infantile paralysis, which has broken out in the city."

The meeting adjourned.

PIONEER OF CAMROSE, MRS. A. FLEMING DIES

Camrose, Alta., Sept. 13.—The death of Mrs. A. W. Fleming of Oshawa, moved one of the oldest residents of the district. Stricken with appendicitis and falling to rally when pneumonia set in after an operation, she died in St. Mary's Hospital, Camrose, on Sunday. Interment was made in the Canadian cemetery. The funeral after funeral services had been held in the United Church, Camrose, Rev. T. E. Armstrong, of Wawil, officiating.

Ian Fraser, who has been employed for the past eighteen months at the Wetsaskiwin Park, is spending a vacation with his parents, Mr. and Mrs. J. B. Fraser. He expects to leave in a few days for Prince Rupert, where he has accepted a position.

DOROTHY NORDBYE DIES OF INFANTILE PARALYSIS

Camrose, Sept. 13.—The first death in Camrose from infantile paralysis occurred early Tuesday morning, when Dorothy, the nine-year-old daughter of Dr. and Mrs. F. A. Nordbye, succumbed to the dread malady. This was the second case reported in the town. The first case reported about a week ago did not develop actual paralysis and the patient is already practically recovered. A few scattered cases of infantile paralysis are reported here and there in the district but it is not known that any death, other than that of Dorothy Nordbye, has occurred in the territory immediately surrounding the town.

Weddings

GOLDEN—KELLEY

A very quiet but charming wedding took place at Cooking Lake Reserve house, on Thursday, Sept. 8th, at high noon, when Florence Elizabeth, eldest daughter of Mr. and Mrs. Froemum E. Kelley, was united in marriage to Thomas Lee Golden, son of the late Mr. and Mrs. Golden, of Dublin.

Rev. Dr. P. S. McCall, of Alberta College, was the officiating clergyman.

The bride, who was given in marriage by her father, wore a French frock of white georgette embroidered with rhinestones and silver, and a band of silver. She carried a bouquet of opelia roses and fern, and was attended by her sister, Miss Violet Kelley, who looked charming in her gown of mauve georgette. Mr. Alex. McNell, of Edmonton, supported the bridegroom. The bride's mother wore a gown of grey melange crepe. The only guest present was Mr. Leo G. Kelley, of Wetsaskiwin, uncle of the bride.

The house was tastefully decorated with sweet peas, asters and fern. After the ceremony, the wedding breakfast was served in the dining room, the table being decorated with pink candles and sweet peas.

Mr. and Mrs. Golden left at 4:10 on the Confederation train for Winnipeg and the eastern cities, where the honeymoon will be spent. Going away the bride wore an imported gown of French blue (embroidered with silver) and but to match, with a coat of grey.

Mr. and Mrs. Golden will make their home in Rouyn, Quebec, where Mr. Golden is manager of the Canadian Bank of Commerce.

The C.P.R. have completed the construction of a new loading platform in their Wetsaskiwin yards.

The nervous system, there is an interval varying from a few hours to several days, during which the patient appears to be considerably improved.

Then there appear the symptoms which show that the central nervous system has been invaded. Three theories are advanced as to the mechanism by which the nerve cells are damaged. The blood supply of the cells in the affected area is diminished through the increase of pressure caused by the inflammatory process. This same pressure is destructive to the nerve cell. The toxication of the virus is also blamed for the cell destruction. It is most probable that all three actions are combined.

Quite frequently at the onset of this stage, there are some involuntary twitches, but of course the most striking feature is the development of paralysis. A leg may be affected or both legs, or a leg and an arm. Again there may be only one group of muscles affected. The paralysis may be progressive, one group of muscles after another becoming involved, but as a rule after paralysis has appeared "if there is no increase in six to twelve hours, no further advance is expected." The extent of the external manifestations is of course indicative of the degree of involvement of the central nervous system.

Hyper-sensitiveness of the skin of the affected limb is frequently noted and pain in various parts of the body is a common accompaniment.

General Precautionary Measures

Keep children away from crowds. Allow them to play outdoors as much as possible, but not in contact with large groups of children. Keep them by themselves as far as possible. Give children wholesome and easily digestible food, including plenty of milk and vegetables. Raw vegetables should be thoroughly washed before being eaten. Milk should be kept cold and carefully protected from flies.

Children should be given a daily tub bath, and their clothing should be washed frequently.

Children should have ample rest. (Continued on Page 4)

Grain Yield of Alberta More Than a Third of Total Prairie Provinces

Heads of Banking Institution on Trip to Vancouver Predicts Canadian Crop of Four Hundred Million Bushels of Wheat—Expects Greatest Movement of Wheat at Vancouver This Year That Canada Has Ever Experienced—Business Conditions Good in the West

Vancouver, Sept. 8.—A Western Canadian crop of 400,000,000 bushels with 175,000,000 bushels in Alberta is the estimate by Sir John Aird, president of the Canadian Bank of Commerce, who arrived in the city today. He is accompanied by Sir Joseph Flavelle, chairman of the board of directors, Sir Thomas White, vice-president, and Mr. S. H. Logan, general manager.

Mr. Aird predicts that there will be the greatest movement of wheat via Vancouver this year that Canada has known, his prediction being based not only on the big Alberta crop, but on the fact that the big grain handling organizations on the prairies now control elevators in Vancouver.

The new freight rates, he believes, will also be an advantage to Vancouver as well as to Eastern Canadian seaports. One of the effects of the low tariff he thinks will be that less Canadian wheat will move by way of Buffalo, and more by way of Quebec and Montreal.

"The new rail rates will help Quebec and will not injure Montreal, while they eventually lead to winter shipment from Halifax and St. John," he said.

The party found business conditions generally throughout the west satisfactory.

Sir Joseph Flavelle said that the demand for the Hudson Bay Railway by the people of Central Canada had become so urgent that no government could refuse the completion of the road any longer. He doubted if it would ever be of great value in the export of grain from Central Canada, but it would open up great mineral areas in Northern Manitoba and lead to the settlement of that part of the country, and would be justified for that reason.

TORIES GAIN NORTH HURON SEAT BY 198

Goderich, Ont., Sept. 13.—Represented in parliament since 1921 by a Progressive, North Huron electors chose the Conservative candidate, George Spotton, of Wingham, in the by-election yesterday to fill the vacancy rendered by the death of John W. King. Mr. Spotton was returned by a majority of 198 over his nearest opponent, Archibald Hilsop, Liberal.

Final figures give: George Spotton, Conservative, 4,531; Archibald Hilsop, Liberal, 4,333; Sheldon Bricker, Progressive, 2,725.

LET US HAVE THE ANSWER

Twenty years ago, nine cars of two-year-old steers, shipped from Red Deer to Chicago by G. F. Root and associates, brought \$4.40 to 4.60 per cwt. It cost \$2.50 per cwt. to run them, leaving \$2 per cwt. for the Alberta grower and no one talked hard times. The same grade of cattle will sell for \$6.00 per cwt in Alberta today and everybody is talking hard times. (The columns of The Times are open to anyone who will undertake to answer the above question.)

Great Prevalence of Divorce in the Dominion Hit by Anglican

Kington, Ont., Sept. 10.—The recent substantial increase in number of divorces in Canada is the occasion of a special report by the Council of Social Service of the Church of England in Canada, which will be presented to the general synod meeting here September 12, outlining remedial measures.

The report says in part: "Fundamentally the cause would seem to lie in a great availing of the popular conception of marriage involving all its sacred character, its permanence and its purpose. If divorce is looked upon as a possible outcome, involving as it does against God and no dishonour to the married couple themselves, marriage will naturally be entered upon without that deliberation demanded by a life-long contract.

"American statistics show, too, that in childless, or one-child families, divorces are more frequent than those in which the gift of children is regarded as a blessing.

"The chief and best remedies would seem to lie in more frequent and definite instruction of our people in public and in private, including more frequent sermons and very definite instructions as to the sacredness, the purpose and permanence of the marriage relationship."

SENTENCED TO FORGERY BEFORE JUDGE LEES

At Wetsaskiwin, on the 13th inst., John Peterson entered a plea of "guilty" to forging the name of A. Brandt on a crown cheque for \$7.31, and also to the charge of uttering the said forged document as if it were genuine. He was sentenced to six months' imprisonment at hard labor, at Fort Saskatchewan gaol.

DID WORK IN A HURRY

A man being pressed by his wife to assist in the house decorating had to go out for the evening and he would paper the room for her. On her return he triumphantly showed her the room.

After looking at it, she asked the meaning of several square mounds under the paper.

"Why?" he exclaimed, "I forgot to take the pictures down."

Indian Is Found "Dead" on Thursty Street

Great excitement was caused in the west end of the city on Monday by the report that an Indian had been found, apparently killed by being thrown from his horse. At the first looking, that something was wrong, Chief Kingzett immediately proceeded with all haste to the scene of the calamity. On his arrival there he found a large crowd of tourists and farmers gathered about the prostrate form of a full grown Indian which was lying in the ditch by the roadside, while a snorting broncho fully saddled and bridled stood at some distance from the body, a large hat and gauntlets and other articles were strewn about the ground.

With his great detective instinct and abilities he ordered the crowd back from the body and proceeded to make a minute inspection of the surroundings first, with a view to ascertaining if there were any evidence of foul play. This completed and noted in his diary, the eagle eyes of the Chief at once turned to a close inspection of the remains of the Indian. His long years of experience in police and detective work enabled him to quickly disclose the fact that the Indian was "dead" drunk.

The Chief immediately commanding one of the automobiles standing around and brought the Indian to the Police Station and placed him in the refrigerator, where, after several hours careful nursing, he was revived. What will happen to the culprit who gave this Treaty Indian intoxicating liquor, will be written in the police records at an early date.

Makes Claim Canadians Talk Too Much

Montreal, Sept. 9.—"The Canadian people talk too much" about their country and themselves."

P. J. Skelton, director of a Manchester, England, publishing company, made the English statement today, just before he sailed with a hundred other British newspapermen for Liverpool from this port after a tour of the Dominion.

Continuing, Mr. Skelton said: They make interminable speeches and supply their audiences with avalanches of statistics causing the guests to be bored and forget promptly everything they have heard. Those who come from foreign countries and from the Dominion have eyes to see for themselves that the majority of Canadians is and how resourceful and energetic the people are.

"Let the outsiders say your praise. Don't talk about yourself."

## Two-Deck Streets for Traffic in Great Cities

Speed Limit of Thirty Miles an Hour to Be Allowed in Specially Constructed Thoroughfares

Chicago, Sept. 11.—Creeping paralysis, commonly known as traffic congestion, will get a run for its money in a few communities at least.

St. Louis and New York are both planning to relieve bound-up traffic by the construction of elevated streets.

Chicago already has a double-decked street in service. This is Wacker Drive, which is three-quarters of a mile in length. The 14-lane roadway holds out hope for traffic relief as travel over it is quick and comfortable.

St. Louis engineers and officials are preparing to submit a bond issue next year for the construction of a three-mile two-way driveway. The upper level of the boulevard will be used for passenger automobiles and the lower level for trucks.

In addition an elevated plaza for parking 6000 cars will be built. The entire project will involve the condemnation of 40 blocks of downtown business property. However, the completion of the project will bring about a saving of several million dollars yearly, says St. Louis business men.

New York will have a long elevated express highway when plans are consummated. This roadway will extend from West Seventy-second street along the Hudson River to Canal street.

At 30 miles an hour, to be permitted by city officials, cars will be able to traverse the length of the elevated thoroughfare in ten minutes or less, considerably better than the elevated train or subway service.

It is planned to elevate the highway to 20 feet, assuring ample clearance for street traffic. The 65-foot width will provide six wide traffic lanes, three in either direction. This will give a traffic capacity of at least 6000 cars hourly.

With traffic in New York increasing rapidly, city engineers believe that this superstreet will be of untold value and worth far more than its cost.

New York residents are purchasing automobiles at the rate of 20,000 a month—seven miles of cars. Consequently this and other traffic relief projects are receiving a great deal of attention.

WEDDING MARCH, BELLS AND ALL, BY RADIOPHONE

Strange things have been asked of the Edmonton Journal's radio station CJCA, located at the gateway to the great open spaces of the north, messages of hope and despair and reconciliation have winged their way through the night bringing joy and sadness and hope to lonely trappers and policemen and managers of posts. But it broke all records the other day when it acted as a wedding orchestra.

Flourace Elizabeth Kelly, of the Cooking Lake forest reserve, and Thos. Leo Golden, manager of the Remy, Quebec, branch of the Canadian Bank of Commerce, were due to be married at the home of the bride's parents and there was no music available.

It has not been disclosed who the unknown genius is, but someone rang up C. L. Smith, assistant operator at CJCA, and asked for the wedding march.

Mr. Smith never hesitated a minute. Quickly he adjusted all the strange dials that radio operators work of, and as the blushing couple were united in holy wedlock, there came from the Kelley radio the strains of the wedding march—bells and all!—Edmonton Journal.

CENTRAL ALBERTA WOOL GROWERS' ASSOCIATION

The Central Alberta Wool Growers' Association, Lacombe, are holding their Thirtieth Annual Sheep Sale this year on Wednesday, October 12th, and are now soliciting entries for the same.

Anyone who has purchased rams, purebred or grade ewes or feeder lambs for sale, should write the Secretary, J. Fraser, at once for full particulars and entry forms.

BEES BUILT IN A TRACTOR

"Pipp" Prokes got a rude shock one day last week in the form of a bees nest built in the machine of a tractor. When Mr. Prokes began the work of rearing the machine down to cover the nest he took exception and there was an interesting battle, but "Pipp" won, coming out with a nice bit of honey and a few stings, naturally, but quite proud of his achievement, as no many can extract honey from a tractor these days.—Bashaw Star.

REVALUATION OF SOLDIERS' LANDS

On his return from a visit to Ottawa, W. S. Woods of the Soldier Settlement Board informed the Alberta board after considerable discussion a revaluation scheme had been adopted for the lands of soldier settlers and that field work to this end would be commenced at once. The decision would be of great importance from the point of view of the settlers.

HOSPITAL AID PREPARING FOR PAZAR IN NOVEMBER

Preparations are under way for the Hospital Aid bazaar to be held in November. Donations of plain sewing and fancy work will be gratefully received.

As this is the only appeal from the Hospital Aid during the year we hope that everyone in the town and country will get behind it and do their utmost to make the bazaar a success.

Donations from Miller will be received by Mrs. A. H. Parker.

Town Topics

Alld. Marshall made a business trip to Calgary the fore part of the week.

Albert Carlson, who spent the summer at Minneapolis, returned home last week.

Th. Simmons and Miss Minnie Simmons visited friends at Port Saskatchewan last week.

Mrs. J. N. Schreffels and son went to Calgary on Monday, where they will spend a few days visiting friends.

Mr. and Mrs. Earl Garlough, of Edmonton, are visiting at the home of Mr. and Mrs. J. F. Ellis and other friends.

W. S. Douglas, of Edmonton, spent Sunday visiting his sister, Mrs. Churchill, and renewing acquaintances in the city.

Miss Jeanne Kuwlan went to Ponoka Tuesday afternoon to spend a few days with her sister, Miss Kuwlan, of Ponoka.

Mr. and Mrs. Alf. Ellis and family returned on Saturday from their motor trip to the Coast. They report having had a delightful outing.

Mr. and Mrs. Shaw, of Calgary, who have been visiting relatives in Wetaskiwin and district, returned to their home in Calgary on Wednesday.

J. P. Ellis left Tuesday morning to visit his father and other relatives and friends in Ottawa, Ont. He expects to be back about the end of the month.

Mrs. Andrews, of Prince Rupert, who has been spending a few days visiting at the home of Mr. and Mrs. J. B. Fraser, left on route for home on Wednesday.

On account of the threatened epidemic of infantile paralysis, the sale of work and tea to be held by Mrs. Paton's group of the Ladies' Aid has been cancelled.

Rev. and Mrs. A. L. Elliott left on Monday by car for a trip to Banff and Calgary. Rev. Elliott will attend a meeting of the board of missions while in Calgary.

As a precautionary measure against the spread of infantile paralysis, the dance advertised to be held in the Angus Hotel hall on Friday evening of this week, has been postponed indefinitely.

L. D. Wright has tendered his resignation as organist and choir leader of the First United Church, and intends leaving, with his family, about October 1st, for Lethbridge, where he will take up his residence.

The many friends of Mrs. Carl Smith are pleased to learn that she is progressing nicely after a very serious operation, which was performed in the Royal Alex. hospital, Edmonton, last week.

Duncan C. Scott, Deputy Superintendent-General of the Dept. of Indian Affairs, paid his official visit to the Hobbema Agency last week. He was well pleased with his inspection and expressed surprise at the excellent crops and the progress made on the reservation since his last visit. He also visited the agency schools and found everything satisfactory. Mr. Scott and Mr. Askey spent Monday in Edmonton.

BORN

CHIRLING—In the Wetaskiwin hospital, on the 10th inst., to Mr. and Mrs. W. R. Chirling, of Ponoka, a son.

SANDREN—In the Wetaskiwin hospital, on the 8th inst., to Mr. and Mrs. Swan Stogren, of Pahn, a son.

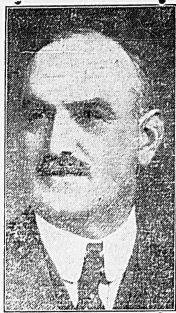

CLARK—Near Millet, on the 3rd inst., to Mr. and Mrs. Abraham Clark, a daughter.

PROVOST—Near Wetaskiwin on the 12th inst., to Mr. and Mrs. Joseph Provost, a daughter.

WORK PROGRESSING TOWARDS CHURCHILL

Winnipeg, Sept. 10.—The bridge crossing the limestone river at Mile 350 on the Hudson Bay Railway will be completed by the middle of September, according to a statement made today by H. A. Dixon, chief engineer of the Canadian National Railways who is in charge of the construction of the road. As soon as the bridge is finished track laying will be started from the limestone river to Mile 356.5, the new junction point to Port Churchill.

All summer more than thirteen hundred men have been engaged building,

W. A. KINGSLAND  
General Manager, Western Region  
Canadian National Railways

ing, widening, lifting fills and ditching on the Hudson Bay Railway between The Pas and Mile 350 the present end of steel. Considerable progress has been made and the track for almost all of the distance is in first-class operating condition. Three steam shovels are being used in this work.

RATS BECOMING MENACE

Moving into territory where they have never been seen before, North Dakota grey rats are finding things very much to their liking in Saskatchewan.

Already the damage they have done in undermining elevators has reached such serious proportions that a circular has been issued by the Saskatchewan pool elevators, owners of more grain elevators than any other firm in the Dominion, some 1,200.

The circular reads: "To all agents: We are advised by some of our elevator agents that considerable damage is being done by rats swarming in from North Dakota. Undermining foundations, these rodents are steadily moving westward. In order to take whatever measures are practical to keep down the pest, we wish you to advise us by return mail if elevator under your charge is subject to damage from this source."

"Pa," inquired a seven-year-old seeker after the truth, "is it true that schoolteachers get paid?"

"Certainly it is," said the father. "Well, then," said the youth indignantly, "that ain't right. Why should the teachers get paid when we kids do all the work?"

W. C. T. U.

Mr. L. P. Tanton tells us how prohibition was won in P.E.I. There was no waiting for the government to declare its policy, it was for the Church and the temperance forces to declare theirs, and they commenced their offensive against liquor sale and the traffic of evil. Rev. A. A. MacLeod resigned the pastorate of the Baptist church of Summerside to take up the work of general secretary of the Alliance. Wm. E. Bentley, K.C., one of the ablest and biggest of the island barristers, left his busy office to his assistants to devote his whole time to the temperance campaign. Mr. Lewis R. Tanton, for many years organizer of the Conservative party, abandoned partizan work and placed his whole time and talent to the work of the Alliance. A. suffering invalid, unable to join in the militant fray, who refuses to allow his name to be given publicly, opened his purse with unstinted liberality not merely in hundreds, but in thousands of dollars. More than in the highest average he divided the way and pointed out effectively "How to do it." His name is not inscribed outwardly, we may not read it, but in the homes he has saved from ruin, the wives and children he has garlanded with protection from evil, and the poor victims he has snatched from the cauldrons of fiery ruin, not in the present day only, but for many years to come, the testimony to his beneficence will be engraved on thousands of grateful hearts.

This is in part, how P.E.I. did it. They watched and worked and prayed. They waited for no war horn to sound the challenge to battle, but armed themselves for the fray. They did not wait for the enemy to possess the field.

At the recent Baptist Convention of P.E.I., among the resolutions sanctioned, was one expressing thanks to God for the recent great moral victory and declaring anew the confidence in the prohibition law as the best means of combating the liquor traffic.

Seven counties of N.B. are still under the Scott Act. Government liquor stores may not be placed there, but government control controlled by the liquor interest, have provided for a mail order regulation to flood those counties with rum.

avoid dry sweeping and dusting. Sprinkle the floor with pieces of dampened paper before sweeping, and use a cloth which has been moistened for dusting.

Inasmuch as there is a great variation in the onset of Polymyositis, at a time when the disease is prevalent,

children showing any evidence of a departure from normal health should be carefully watched and isolated. It is urgent that prompt medical attention should be given in all cases.

The abortive or very mild types of the disease which recover in a few days without any paralysis, and the carriers who harbor the virus of the disease in the nose and throat but do not develop the disease, are now known to be the most important factors in the spread of infection and render the control of the disease an extremely difficult problem.

In patients suffering from the disease, careful attention should be given to the prompt disinfection of all nose, throat and bowel discharge, and to articles soiled therewith.

When the disease is prevalent all children known to be ill and not receiving medical attention should be reported to the local board of health.

The quarantine period in Polymyositis is three weeks from the onset of the infection. Exposed children of the household and adults of the household whose vacation brings them into contact with children, or who are food handlers, should be quarantined for 14 days from last exposure to a recognized case.

5,000 TEACHERS AT CONVENTION

The World's Federation of Teachers, whose convention was held at Toronto recently, when nearly 5,000 teachers represented 39 different countries of the world, will be a great factor in making a contribution to the educational interests of the future, in the opinion of John T. Ross, deputy minister of education for the province of Alberta, who has just returned from Toronto.

Mr. Ross attended the convention as Alberta's delegate.

Mr. Ross states that much of the real work of the convention was completed in private, work out of the reach of the public, although much

work was done in the open assembly. Problems of particular educational significance were brought out at the convention, and with the representation from all parts of the world, delegates were able to appreciate the problems which teachers in other countries are meeting.

LET PEOPLE KNOW.

Reader—If you find The Times bright and interesting, remember that you can make it even more attractive if you mail or telephone the editor all the personal items you can think of. Have your visitors at your home? Are your neighbors entertaining guests? Have any members of your family gone away on a trip? Are your friends out of town? Do you know of new residents coming here to settle? Have you hidden good-bye to Wetaskiwin-ites who are to make their homes elsewhere? Let The Times know.

A WOMAN'S LOGIC

Mrs. Jones cast an entirely new light—and it may be a wholly reasonable one—on the problem of woman's dress the other night. She and Mr. Jones were awaiting callers, and Mrs. Jones surveyed her new gown rather critically. "Isn't it a little extreme?" he suggested. "A little short and low cut?"

"Well, I don't know," said Mrs. Jones. "They're coming to see me, aren't they—not the dress?"

## SPORTING NEWS

## Two Hundred and Fifty Members Is Objective of Local Sports Association

Executive Highly Gratified Over Labor Day Sports Despite Small Financial Deficiency—Brickman and French Tied for Aggregate Honors—More Boxing Bouts to Be Arranged for—Money Required to Level and Seed Oval

The Executive Committee of the Wetaskiwin Sports Association met on Friday evening and checked up on the finances of the Labor Day Sports, a deficit of approximately ten dollars being reported. The unanimous opinion, however, prevailed that a great deal had been accomplished in the initial steps of the revival of interest in track and field athletics. There is no question but that had the program been staged in the off season of harvest activities, the Association would have garnered a tidy balance to assist in its operation of transforming the fair grounds into a first-class athletic park.

Consideration was given to the necessity of procuring further funds to proceed with work on the grounds. If we are to have the sward and track in condition for next summer, a great deal more work must be done this fall. While the sod has been well turned, extensive operations are necessary in leveling and seeding before winter sets in. The money derived from the sale of approximately one hundred and twenty-five memberships has been set aside to meet expenditures to date, and the Committee are anxious to secure at least as many more members at one dollar per shot, so that operations can be continued. Messrs. McMurdo, Richards and Bellamy were appointed a committee to take up the matter of assistance from various organizations, it being pointed out that the whole venture is a community enterprise.

Secretary McMurdo was instructed to communicate with the Edmonton Branch of the Canadian Legion for their co-operation in supplying the talent for the boxing bouts, which made such a decided hit. Members of Executive who had witnessed such big time pugilistic stuff as the Dempsey-Gilhooley go, stated that they had received more real enjoyment out of the Labor Day bouts. Such hearty commendation had been extended towards the Association for bringing to the city such clean, clever and willing boxers as the sextette from Edmonton, that it was decided to have further entertainments of this nature in the city, if possible, and Messrs. Bellamy and Chalmers were appointed a committee to make necessary arrangements, it being suggested that the bouts be held towards the end of next month. Thanks are also being extended to the Edmonton Police Amateur Athletic Association, who furnished considerable of the equipment and implements for the occasion.

The Labor Day Committee was authorized to make arrangements for a public presentation of the prizes won by various contestants on Labor Day. Further announcement will probably be made in next week's press. While the Committee has not definitely made the official award, it was announced at the meeting that a couple of contestants were over the age limit for Juniors and that as a result of checking up Morgan French is tied with A. Brickman for aggregate honors, with 9 points each, P. Moan having 8 points.

## YANKEES LOSE DAVIS CUP

The Davis Cup, most highly prized of tennis trophies, passed Saturday from the United States to France. In a dramatic uphill battle, France's youthful stars broke through the defence of veterans, captured both of the remaining singles matches Saturday, and won the challenge round by the margin of 3 to 2. LaCoste, scoring his second victory of the series, outstroked, outgeneralled and easily outlasted Tilden. The French stylist won by scores of 6-3, 4-6, 6-3, 6-2, and his victory was as decisive as these scores indicate. Cochet won from Johnson by scores of 6-4, 4-6, 6-2, 6-4.

## NORMA'S FAME SPREADING

It was no mean afternoon's record that Miss Norma Chiddy hung up at the fair grounds on Labor Day, and Wetaskiwin is getting a bit of advertisement out of her outstanding performance in that she has won a vicarious record and tying another. The Calgary Alberta carried quite a lengthy story in its sport pages the other day. Such budding athletes as the Misses Barrell, Sorenson and French are also going to go big next year.

## DOESN'T SET A PRECEDENT

It develops that A. Brickman and M. French are a tie for the aggregate honors among the boys at the Labor Day Sports. Now what's to become of the silver cup (unless one gets the bowl and the other the handles)? Last year at the annual track and field

championships (senior) of the Alberta Branch of the Amateur Athletic Union of Canada, Russell, of Medicine Hat, and Waynes, of Calgary, tied for aggregate honors. This year Wayne has been living in Edmonton, and at the annual provincial meet held in that city recently he and Russell again finished a tie on the sun-up of the day's doings. However, in connection with the provincial championships aggregate, there is a shield as well as a cup, and the two athletes have alternated in the possession of the two trophies.

## MAN CUP RETURNS WEST

Toronto Westons were defeated at New Westminster by the Salmon Belles in the finals for the Canadian Lacrosse Championship, who will represent Canada at the Olympic games. The score total for the two games was 6-2. The Westons' share of the net receipts was \$3,000. With the winning of the Mann cup Saturday New Westminster became the custodians

for the 10th year. They held it first in 1915, 1916 and 1917, then from 1920 to 1925, inclusive, and now in 1927.

## ANYTHING APT TO HAPPEN

New York Americans have clinched the race in the Ben Johnson circuit, while Pittsburgh has a slight lead in the National League, the Giants and Cards a tie for second place. The National League schedule is filled

with potent possibilities. It calls for Chicago to meet St. Louis in the latter city in a two-game series Oct. 1, 2. The pennant may ultimately hinge on the outcome of those two games. When New York invades St. Louis on Sept. 13 for a four-day stay it means seven games must be played during that period. If either team emerges from that series with a commanding margin, by taking, say five out

seven, it would practically mean the elimination of the vanquished foe from the pennant chase.

Another series that may have much to do with deciding the pennant is scheduled for Chicago on Sept. 25, 26, 27, when Pittsburgh meets the Cubs in a battle to death.

## WEST FAVORS DEMPSEY

"That Jack Dempsey will be the winner over Gene Tunney in the coming world's championship fight is the opinion of the majority of the leading sport critics of the Western States," advises Harry Scott, Sporting Editor of the Calgary Albertan, who returned Saturday from a three weeks' vacation.

## WINS WATCH AT CAMROSE

P. T. Kirsten won first prize, a gold watch, in the second flight of the golf tournament held at Camrose last week. The first event or qualifying round was won by John Rodgers, of Vegreville, who made a score of par in the second round.

## IT DOESN'T SEEM ENOUGH

Tex Richard has signed the principals in his heavyweight spectacle at Soldiers' Field, September 22, to a new set of contracts, guaranteeing Gene Tunney a flat \$1,000,000 and Jack Dempsey \$425,000.

## MAY SMASH OLD RECORD

Chalking up his fifty-second home run on Tuesday, Babe Ruth is within seven homers of the record which he set up in 1921.

### GETTING SPECIALS FOR CREAM

Try C. K. Johns, Dairy Bacteriologist,  
Edmonton, Alta.

"How is it, George, that you are always getting 'specials' for your cream in the summer, while most of us never seem to?" The cream grader tells me that I allow too many bacteria to get into my cream and that this pulls down the grade. Do you put up a sign around your milk-house, 'Bacteria Keep Out' or how do you work it?" This question was asked one Sunday discussing their problems.

"I guess a sign would not be much good for fellows as small as we are," George replied. "They tell me that there are about 1,000 millions of bacteria in a space as large as a pin head. However, if I had not had a chance to see them once at work I wouldn't have believed they are as important as they are. If more of us could see them and what they do to the milk, we would be

more careful in trying to prevent them getting a start, just as I have been since I first saw them under a microscope."

#### Under a Microscope

"When did you see bacteria under a microscope?" queried his friend, and "You remember the winter I worked in Edmonton handling coal?" asked George. "Well, there was a medical student from the university rooming at the same place as I was. He told me he worked as a cream grader in the summer, but since his course, and as he got to talking over the causes of different bad flavors in cream. He told me that bacteria caused sour, stinky, cheesy and bitter flavors, while yeasts caused yeasty flavor. I told him I'd like to get a look at some of these little rascals that had been robbing me of good money on my cream checks, so he said he would fix things

for me to see some of them, as he had a microscope in his room.

"The next night he brought home two samples of milk. One was nice and sweet, while the other had soured. Then he smeared a little from each jar on different ends of a glass slide, and after staining it a blue color, he put it under the microscope. We looked at the fresh milk first, and hunted quite a while before we found one of those bacteria. Even though it was magnified a thousand times under the microscope, it was still so small I had all I could do to make out its shape. But when we looked at the sour milk smear, we didn't have to hunt for bacteria! They were there by the millions. We kept the fresh milk a couple of days until it soured, and when we then examined it, it was just like the first lot, crowded with these tiny bacteria.

"If that were the case, how would these milk companies in the cities be able to deliver sweet milk the morning after a thunderstorm?" he asked.

"Search me!" I said. "I never thought of that before, but what really makes the difference?" Our milk on the farm nearly always turns sour when there is a thunderstorm.

"Well," said the student, "these bacteria are something like a wheat plant. They have to have the right food, moisture and a suitable temperature to make good growth. Milk makes the most food for them, as well as for calves and kiddies, so if we are to check their growth we must make the temperature too low for them. The city milk plants cool their milk down to 45 deg. after weaning it to destroy disease germs, and it stays at that temperature until it is delivered. On the other hand, milk on the farm is seldom cooled below 60 deg., and at that temperature it will curdle in half the time it takes at 45 deg. A thunderstorm comes on a hot day; the higher temperature allows the bacteria to grow faster, and the milk sours more quickly."

"That how do bacteria cause the sour taste in milk?" I asked.

"When they grow, they feed on the milk sugar, and turn it into lactic acid," he replied. "The suitable bacteria we have in the milk, the faster they grow, the quicker the acid is produced. It's like two men digging a ditch compared with two hundred. The more workers, the faster it's done. Under suitable conditions, bacteria will double in number every half hour, so you can figure out how many you may have after 24 hours if conditions are right for them. That's why the temperature is so important."

To keep out bacteria

"Well, sir, I had several talks with this student along these lines, and I learned a lot. One time he took me over to a hospital where they were preparing for an operation, and he explained to me how they went about getting rid of all bacteria in the operating room, because certain kinds would form pus if they got inside the body during the operation. So I asked him the best way to keep bacteria out of milk or cream. He told me that the most of them got in from the milk pails, strainers, cans, separators or milking machines, when these were left in such a condition as to allow bacteria to grow there. If they were not thoroughly cleaned, there would be lots of food left for them. If they weren't properly sealed with boiling water after cleaning, there would be lots of bacteria left to multiply between milkings. And if they were

left with drops of water inside, the bacteria would grow even so much faster than if they were left dry. He said one of the best ways to dry them was to drive strong stakes into the ground in front of the milk house, and simply unpeel the scalded cans and pails on these. They would dry then without getting any dust into them.

"Next to the pails and cans and troughs, he said the little bits of dried manure from the cow's coat carried the most bacteria into the milk. He said the time spent in cleaning a milch cow meant money in the pocket of the farmer.

#### Have a Cooling Tank

"Another time I asked him the best way to cool cream down low enough that the bacteria would be pretty well checked. He said to separate into a small pail sitting in a larger one filled with cold water, then to have a tank placed between the pump and the watering trough to set the cans in, so that the cold water went down to the bottom of the tank and the warmer water flowed off from the top into the trough. He said they had things fixed like that on his home place, and they could keep their cream sweet for nearly a week. So when I got back here the next spring, I got busy and made a cooling tank like that he described, and that's one big reason why we've been getting 'special' for our cream right along. I figure that tank has made me around \$50 each year through the better grades I've been getting for my cream."

"Well, George," said the other, "you've sure given me lots to think about this afternoon. Now that I've got some idea of what these bacteria are, and how they work, believe me, I'm going to see to it that they don't spoil the grade on any more cream of mine. I can't afford to pay good money out for feeding them any longer—it's altogether too expensive a luxury!"—Farm and Dairy.

#### HOW THE FRENCH DRESS THEIR POULTRY FOR MARKET

The French method of dressing poultry, according to the department of agriculture, usually consists of bleeding the bird by cutting the jugular veins with a pair of small scissors or a sharp knife inserted through the mouth; thus there is no opening on the outside of the neck. The feathers are removed as in the case of the English method, more or less laboriously, by holding the bird across the lap of the picker.

After the feathers are removed, the birds are partially drawn, using what, in the United States, is called the Boston method, which consists of inserting the first finger through the vent and drawing out the intestines, which break off at the gizzard and at the vent; thus there is no external sign of the bird having been drawn, except the falling in of the

abdominal walls. The breast is broken down with a club and the wings are locked in the usual manner, with the tips across the back. This locking also holds the toes of the bird, which have been brought forward by squaring the carcass. The birds are then cooled, shucked, packed in baskets between alternate layers of straw, and shipped to market. They are exposed for sale either on counters or suspended by the head from hooks. Almost invariably they are exposed with the back to the purchaser. The locking of the toes in the wings makes it possible to hang them up without destroying the flat-backed appearance.

Another method of French preparation, which is also used to some extent in Italy, is the sewing of the birds in cloth. After the bird has been killed, plucked, drawn, the breast broken down, and the legs locked in the wing, the whole carcass is wrapped in a specially shaped cloth, which is drawn very tight and sewed. The birds are then placed on shelves for cooling. This cooling process is hastened by sprinkling the cloths with water, thus cooling by evaporation.

The cloths sometimes remain upon the birds until they go to the retailer, where they are removed and returned to the original shipper. More often the cloths are removed from the carcasses upon leaving the farm, and the birds are packed in hampers with alternate layers of straw and are so shipped. By sewing the warm carcasses in these cloths the birds are made to look especially compact after cooling, the wings and legs being compressed into the body flesh, so that the resultant product looks like a solid roll of poultry.

#### WINTER CARE OF THE DAIRY HERD

(Experimental Farms Note)

Dairy cattle have been kept at the Dominion Experimental Station at Rothamsted since 1914, and although methods of feeding and management are in some respects different from those in most herds, the health and vigor and production of the animals comprising the herd are such as to justify what has been done. Cattle do not seem to know whether the stable is painted or unpainted, whether it is made of dressed lumber or logs, their production and condition of health does not seem to vary with temperature. They are, however, affected by feeds, regularity of feeding, draughts, exercise and sunshine. The cows in milk and the calves dropped after July 1st are kept in stables free from draughts and so ventilated as to be supplied with dry fresh air but not warm, the temperature frequently dropping to below zero. It is convenient for the herdman to have water in the mangers but the temptation then is to deprive the cows of sufficient exercise and sunshine. If turned out twice daily for water irrespective

#### SALT RHEUM ALL OVER HER HANDS COULDN'T DO HOUSEWORK

Mrs. Walter Miner, Midville Branch, N.S., writes:—"I had salt rheum all over my hands and especially between my fingers. It was impossible for me to put them in water, or do my housework."

"After trying medicines and salves, which did me no good, I heard of BURDOCK BLOOD BITTERS being so wonderful, and after taking two bottles I am entirely relieved of my trouble."

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

# GILLEX

cleans everything

## In less time

because it is such an efficient solvent of grease, makes hard-to-clean objects quick and easy-to-clean, and makes hard water soft as rain.

## At a quarter the cost

one 12-oz. package equals four pounds of ordinary borax and other cleansers, powder or liquid.

## Without risk to surface or fabric

because you loosen the dirt, then rinse it off or out, the surface or threads are never abraded or cut by scouring action of rubbed dirt.

Made in Canada  
E. W. GILLET COMPANY LIMITED  
TORONTO

Winnipeg

Montreal

of the weather the cattle are more healthy. Calves dropped before July 1st, bulls and unrefreshed heifers do not require stables. They thrive in corrals having pole and straw shelters over the north end. When provided with plenty of fresh bedding they do not seem to mind the low temperatures although wind does affect them adversely. It is better if the shelter can be closed in time of a storm.

Cattle can be carried through the winter under such conditions increasing in weight if they have sufficient feed of the right kind. They thrive on plenty of hay or oat straw and ensilage with a little meal. They thrive better if feeding, watering and milking are carried out with regularity.

Advertise in the paper that circulates all over the district thoroughly.

## "Soft, Warm and Kindly"

Many people cannot wear ordinary wool underwear on account of the irritation it causes.

But everybody can wear

## DODS-KNIT Underwear

Dods Underwear is made in two-piece and combination suits in sizes to fit all members of the family—men, women, boys and girls. Make sure you see the Dods-Knit label on the underwear you buy this Fall. Don't accept any other. Sold all over Canada.

The forerunner of colds and gripe.

Heat and inhale Minard's and rub it on the throat and chest.

The great preventive.

Here and There

Air mail service between Winnipeg and Fargo, North Dakota, has been inaugurated and the first mail from Winnipeg from the United States arrived recently.

The Shorthorn, King of the Faires, recently sold from the Canadian ranch of H. R. H. the Prince of Wales to a United States breeder, at the highest price at the Calgary Exhibition.

Farm Sales a Specialty.

Evidence of the removal of interest of Old Country investors in Western Canada are seen in a number of recent transactions recorded at the Winnipeg, including the proposed erection of three motion picture houses by means of English capital.

Moderate Deapartment, when clearing his farm south of Vernon on the Canadian Pacific line, found a 300-lb. boulder which was half native silver and worth about \$1,200. The discovery has aroused considerable interest among mining men in Cobalt and elsewhere who are arriving in numbers.

London, Ontario, now has an air harbor. Through efforts on the part of the Chamber of Commerce an ideal air-field site has been taken over, and within a month's time will be completely equipped and ready to use to provide an air depot available to all planes that seek London as a stopping place.

According to a financial statement issued from the headquarters of the Canadian Pacific Railway Company, the gross earnings of the Company for the first six months of the year ended showed an increase of \$5,644,778.65. The net profits, however, decreased about \$500,000 due to a four million dollar increase in the working expenses for that period.

Quebec City lived up to its traditions as the historic gateway and welcomed their Royal Highnesses the Prince of Wales, Prince George and Princess Mary. Balmorally with a tremendous burst of enthusiasm and a blaze of color. Vast crowds thronged the docks and waterfront as the Canadian Pacific S.S. Empress of Australia, bearing the distinguished visitors to Canada, steamed into sight.

Experiments in pest prevention by means of spraying chemicals over wheat fields from airplanes is about to be tried out in Manitoba, under the direction of the Dominion Government Department of Agriculture. The chemical used is merely sulphur in a colloidal state, technically known as "Colo." It is said that one plane can treat 6,000 acres a day, flying at a height of 50 feet. The machine will carry 700 lbs. of chemical in the mechanical apparatus.

"Austrian bakers have discovered that with the use of Canadian flour they can make more and better bread. The prohibition of night baking also favors the employment of fast-baking flour," says the Commercial Intelligence Journal, Ottawa. Frederick Frank, Austrian Consul, says his country is anticipating with gratification a trade treaty with Canada; for, while the war reduced Austria's population from 54,000,000 to 3,000,000 the city of Vienna has still 2,000,000 to feed.

### BIG BUSINESS

A Florida real estate man, who was always coming home with tall stories of sales into thousands and hundreds of thousands of dollars, was arrested one evening by his son, aged eleven, who announced:

"Well, dad, I've sold the dog."

"You've sold the dog?"

"Yup."

"What for?"

"For ten thousand dollars."

"Ten thousand dollars? What are you talking about? Where's the money?"

"I didn't get money, dad. I got two five thousand dollar bills for it."

### He Said a Mouthful

Teacher: "Robert, give me a sentence using the word 'satiate'."

Bobby: "I took Mamie Jones to a picnic last summer and I satiate quite a lot."

### THE DAILY MIRACLE

Time is the most valuable of all human possessions. It outranks Love, for love is not permanent. It abides after friends are gone and wealth has vanished.

Time is priceless because it is changeless. Of all other things one must say: "This, too, shall pass away." Time is the only thing that never ceases to be.

The most precious thing in life is the twenty-four hours which are allotted to mankind each day. Time is the changeless possession. And the more time one has, the wealthier one is. And in this, Youth is the wealthiest of all.

Time is the equal possession of mankind. Without time nothing is possible. With it, all things are. Rich man, poor man, beggar man and thief, all are equally blessed by the daily miracle—Time!

### MOISTENING POSTAGE STAMPS WITH TONGUE DANGEROUS

The postage stamp, that little but most important article in our civilization, bids fair to present a serious sanitary problem. Bacteria have been found on nearly all postage stamps brought loose in the open market, according to a number of recent microscopic examinations made.

The germs were found adhering to the gummed side of the stamps and the majority of the organisms were classified as possessing the possibility of producing pathogenic conditions.

We have our pure food laws and our pure drug laws. We have done away with the common drinking cup nuisance and put the paper cup in its place. The old style roller towel has made room for individual sanitary paper towels. But although millions of stamps are distributed every week they are pawed over by clerks, finger soiled, drawer soiled and counter soiled several times before they reach the user's tongue to be moistened and stuck on a letter or package.

In one of the investigations made, fifty stamps were bought at random in the open market of accommodation stores. Twenty out of the fifty stamps contained germ colonies too numerous to calculate. The remaining thirty stamps housed anywhere from one to thirty-four colonies of bacteria.

The report of the examination goes on to say that it is exceedingly dangerous to lick postage stamps, because most of the stamps are bacteria-laden and under favorable conditions might easily convey pathogenic types, especially cold, diphtheria and tuberculosis.

In the opinion of a prominent Health Commissioner: "Licking stamps may be the first step toward a tuberculosis camp. Millions of people moisten stamps with their tongues and these stamps may have been shown to contain a solid counter or torn off with dirty fingers as an instant before. In view of the fact that here are thousands of sufferers from tuberculosis and other diseases, these seemingly insignificant acts are fraught with grave danger."

### AGE NOT A MATTER OF YEARS

A noted physician said recently: "The woman who conceals her age is a public benefactor. Through her determination to stay young—even to the point of denying the calendar—has set up higher health standards. Age is not a matter of years but of (vital) changes. While she keeps her body and spirit young, she is young."

### Call Later

Salesman: "Would you like to exchange your typewriter for a new one, sir?"

Merchant: "Not just now. I only married last week."

Nervous Patient: "Will the anesthetic make me sick?"

Doctor: "No, I think not."

Nervous Patient: "How long will it be before I know anything?"

Doctor: "Aren't you expecting too much of an anesthetic?"

### A Double Escape

#### DOCTOR'S DAUGHTER'S STORY

Another Toronto home provides evidence of how a simple cut, scratch or bruise, may pave the way to deadly blood-poisoning, and how vital is the need for keeping Zam-Buk, always handy? When called upon at 4, Business Avenue, Mrs. J. E. Zealey, daughter of the late Dr. Zealey, of St. David's, S. Wales, said:—"My boy Alfred scratched his leg with the brass tip of a shoe. A nasty poisoned sore developed and it defied all the usual ointments. Hearing splendid reports about Zam-Buk I decided to give it a trial. To my great relief, the pain soon ceased. Healing set in. All inflammation and poison matter was quickly removed by Zam-Buk, and it healed the sore without leaving a scar."

"Again when I fell over a steel fence and injured my knee badly, Zam-Buk alone saved me. My daughter, a nurse, was of the opinion that only an operation could remove the mass of inflammation and pus. But I again pinned my faith to Zam-Buk, and it cleansed and healed the wound. All druggists and stores sell Zam-Buk at fifty cents per box. Equally valuable for eczema, pimples, cuts, burns, etc."

### THINK IT OVER!

There is one virtue which no man or woman in business should neglect to cultivate. It is graciousness. A service rendered with graciousness is magnified to the person served until it seems, as indeed it is, a far greater service. Graciousness isn't toadyism. It isn't fawning upon superiors and condescending to inferiors. The true graciousness is not an assumed thing, put on and laid off like a garment. It is a trait of character, which grows as it is cultivated. It is courtesy, kindness, helpfulness, understanding. Be gracious, always, because it is an attribute of the gentleman and gentleman everywhere. And if that is not reason enough, be gracious because it pays.

### THE WORLD'S OLDEST M.D. JOKE

Wit and satire are of ancient origin, but humor, it is claimed, belongs to modern times. A certain type of story, having a sudden and terse conclusion to a direct statement, has been labeled as purely modern. For instance: "Little Willie Jones loaded and fired a toy cannon yesterday. The fuse was lit for tomorrow." But the truth is, this type of story is of extremely ancient origin. If you will get a Bible and turn to the twelfth verse of the sixteenth chapter of the II. Chronicles, you will read: "And Asa in the thirty-ninth year of his reign was diseased in his feet, until his limbs were exceedingly great; yet in his disease he sought not the Lord, but turned to the physicians—and Asa slept with his fathers."

### THE PESSIMIST

Nothing to do but work.  
Nothing to eat but food.  
Nothing to wear but clothes.  
To keep one from going nude.  
Nothing to breathe but air.  
Quick as a flash 'tis gone.  
Nowhere to fall but off.  
Nowhere to stand but on.  
Nothing to comb but hair.  
Nowhere to sleep but in bed,  
Nothing to weep but tears,  
Nothing to bury but dead.

Nothing to sing but songs,  
Ah, well, alas, alack!  
Nowhere to go but out,  
Nowhere to come but back.

Nothing to see but sights,  
Nothing to quench but thirst.  
Nothing to have but what we've got;  
Thus through life we're cursed.  
Nothing to strike but a gait;  
Nothing to move but at a go.  
Nothing at all but common sense  
Can ever withstand these woes.

### TIPS WORTH WHILE

Worry is the interest on trouble,—paid in advance.

The proper place for a knocker is outside the door.

If you are standing still, the world is passing by you.

If you let a thing slide, remember it won't slide uphill.

The work we do today, makes our reputation tomorrow. They say, "He is the man who did so-and-so."

A sense of humor is the sauce that flavors the daily routine.

If the elevator to success isn't running, take the stairs, don't wait.

We can judge others only by the extent to which they know ourselves.

There's more money in making good than in making excuses.

Get an idea that is big enough and the world will soon make room for it.

People don't always remember good service; but they never forget bad.

If you have yesterday's business on your mind, what will become of tomorrow's?

The successful man is always busy, whether he feels like it or not. Any man can work when he feels like it.

Words are as deep as he who speaks them.

### HEART PALPITATED AND FLUTTERED Had Real Bad Spells

When the heart begins to beat irregularly or intermittently, palpitates and throbs, ships beats, beats fast for a time and then so slow as to seem almost to stop, and the least little excitement seems to affect it, it causes great anxiety and alarm.

To all sufferers from heart trouble we would advise the use of

as we know of no remedy that will do so much to make the heart regain strength and vigor, regulate its beat and restore it to a healthy, normal condition.

Mrs. Ambrose Orser, Elginburg, Ont., writes:—"I suffered for some time with a bad heart. The least little excitement would cause it to flutter and palpitate and at times I had real bad spells. I suffered in this way for some time when one day I saw Mr. Milburn's Heart and Nerve Pills advertised, so decided to try them. I had only taken a few boxes when I noticed I felt better, so I continued taking them and in a short time my heart felt entirely different."

Price, 50c. a box at all druggists or dealers, or send direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

 Sunday, Sept. 18—  
 11 a.m., Sunday school; 8 p.m., Gospel service in the English language.  
 Wednesday, Sept. 21—8 p.m., the regular prayer and praise service.

**BIBLE SOCIETY SUNDAY**

The Bible is acknowledged by intelligent Christian people to be the greatest Book of all literature. The Bible Society is assigned the task of printing and distributing the Bible throughout the entire world, in the mother tongue of the people and at a price in reach of all. This means to many it must be given free of charge. It is non-sectarian and a helper of all Churches.

Our branch of the Bible Society in Northern Alberta is under the direction of Rev. J. K. Smith, of Edmonton. Mr. Smith with other helpers will visit Wetaskiwin on Sunday, September 18, and will endeavor to speak to the different congregations.

There will be a mass meeting in the evening at the close of the regular service at about 8:15 o'clock in the United Church, to appoint local officers for the ensuing year. Mr. C. A. Morris is the president of the local

society and Mr. J. F. Ellis, secretary. It is hoped that everybody will take an interest in the work of the society and help it along. This work is carried on by the voluntary contributions of the people.

**LACOMBE PRESBYTERY**

TO RAISE \$4,500

At the annual presbytery meeting held in Lacombe on Wednesday, the Rev. J. B. Francis was elected chairman, and Mr. R. B. Layton, secretary. The regular business pertaining to presbytery was conducted, special attention being given to the home mission maintenance and extension fund, which was set this year at \$4,500, the various fields assuming the same allocations as last year. It is possible that later in the fall a spiritual retreat for the presbytery will be held. Rapid progress is being made with the new United Church, Ponoka, the plastering has been started and the building will probably be opened and special dedication services held on the second Sunday in October.

**AUTO ACCIDENT NEAR CAMROSE**

On Friday night last what might have been a serious accident occurred when Iver Hagen and Ralph Dahl were crossing the C.P.R. tracks just west of town. Iver Hagen was driving the car, a Ford touring, and after crossing the track coming towards town, a car with only one headlight approached, causing Hagen to be temporarily blinded, with the result that the car swerved, struck the sidewalk and carried the sidewalk with it into the ditch. The Ford turned completely upside down. Neither of the boys received any injury. The front axle and top of the car were damaged. The driver of the other car did not stop.—Camrose Canadian.

**SPECIAL NOTICES**

\*\*\*Do you remember how you laughed at the "Cokes and Kellys"? George Sydney and Charlie Murray have made another picture "Lost at the Front," with just as many laughs. Do not miss seeing it at the Angus Theatre, on Friday and Saturday of this week.

\*\*\*The Ladies' Aid of the First United church will hold their quarterly tea on Saturday, Oct. 1st, in the church. All are welcome.

Hoot Gibson, the smiling cowboy, will be seen in a Peter H. Kyne story "A Hero on Horseback," at the Angus Theatre, on Monday and Tuesday, September 19 and 20.

Group A of the Ladies' Aid of First United church will hold a social fair on Friday afternoon and evening, Oct. 14th, in the old Banner Store.

Raising reindeer for commercial purposes in Canada will be undertaken this year by the Dominion Reindeer Co., with headquarters at Vancouver; the company having imported some 5,000 head of reindeer from Alaska. This herd will be located on the vast grazing areas between the Athabasca and Great Slave Lakes on three million acres secured for that purpose.

H. W. Lennox, Inspector for the Dominion Forestry Branch at Indian Head, says: "The demand for trees has been insistent from all over the west. This year we have orders for 8,000,000, as against 5,000,000 in 1925. Following his tour of the west, he said: "I find generally a more settled feeling. People are planning for the future. The old days, when farming was a here today and gone tomorrow affair, have disappeared. Farmers are planting trees, and wherever a grove of trees is found, there you will find contented homes."

**CARD OF THANKS**  
 The undersigned wish through the columns of The Times, to sincerely thank all kind neighbors and friends, especially Mr. Thorpe and son and Mr. Davis, for their sympathy and assistance during their recent sad bereavement, and also for the beautiful floral tributes.  
 Mrs. O. E. Olson and Family.

**HILLSIDE**

Miss Foster spent the weekend at her home in Port Saskatchewan. The Rally Day service will be held in the school house on the first Sunday in October.

Miss Atkins left on Sunday for Wetaskiwin, where she has accepted a position.

The regular monthly meeting of the Junior Wide-Awake will be held in the school house Friday evening.

Mr. L. N. Marr has purchased a 24 inch Rumeley separator and will commence threshing operations next week. The threshing meeting of the U.F.A. will be held this Saturday evening, Sept. 17th, at 8:30 o'clock.

The output of coal from Canadian mines during April last was 45 per cent. greater than the average for April in the past five years.

Over 30 prominent British bowlers arrived in Canada on the Canadian Pacific liner *Malaya* coming to tour this country at the request of the Dominion Bowling Association.

Extension of trade between the United Kingdom and Canada is the professed object of Theo. Foulden, director-general of the Empire Trade League and editor-in-chief of the Empire Mail of London, who arrived aboard the Canadian Pacific liner "Empress of Australia," recently.

Fry to the number of 185,000 have been put in the rivers west of here, with the 60,000 which Fisheries Inspector Martin, of Banff, has just planted. The fry were conveyed in large cans, 5,000 to the can, travelling 140 miles with only one death. The fry are of the brown trout variety.

The Western Canada Dairy Convention which includes all dairymen interested in the four Western Provinces, will be held in the Hotel Saskatchewan, Regina, from February 7th to 10th next year. This Association will be hosts to both the inter-provincial gathering and the annual provincial dairy convention of Saskatchewan.

The new mammoth pier of the Canadian Pacific Railway was officially opened recently as a feature of the Empire Vancouver celebration of the Diamond Jubilee of Confederation. Numerous mayors and officials of the United States and Canadian Pacific coast ports added an international note to the ceremony.

Raising reindeer for commercial purposes in Canada will be undertaken this year by the Dominion Reindeer Co., with headquarters at Vancouver; the company having imported some 5,000 head of reindeer from Alaska. This herd will be located on the vast grazing areas between the Athabasca and Great Slave Lakes on three million acres secured for that purpose.

**STEAL CAR; DRIVE IT TO WETASKIWIN**

A stolen Ford coupe, the property of W. Watkins, 10164 83 avenue, taken from in front of the house at 5 o'clock Thursday evening, was taken by three juveniles, two of them aged 12 and one aged 13 who drove the car to Wetaskiwin. At 2:15 Friday morning the chief constable at Wetaskiwin found the boys and placed them under arrest, notifying the city police by telephone. H. Gutteridge, juvenile officer, will take charge of the case.—Edmonton Journal.

**SHORT COURSE TO BE HELD AT OLDS S.A.**

The Olds School of Agriculture offers a scholarship of \$110 to the girl student attaining highest standing at the short course to be held at the O.S.A.

The Short Course for the candidates is to be held between the dates of October 4th and 7th. Each Institute and U.F.W.A. in Central Alberta is given the opportunity to send one representative to this course. To the student attaining the highest standing will be awarded the scholarship. In the event of the winner being unable to attend, the scholarship will descend to the girl standing second. This will be used in defraying her expenses while attending the regular course at the O.S.A.
